Summary

Computer Science undergraduate with strong foundation in **Data Structures, Algorithms, and Object-Oriented Programming**. Proficient in **Java, C++, JavaScript, and Python** with experience in **software development and backend engineering**. Familiar with **web application development, REST APIs, and database management**. Working knowledge of **Linux environments, networking fundamentals, and system design basics**. Strong problem-solving ability with effective **communication and interpersonal skills**, enabling collaboration in team environments.

Education

Chitkara University

2023 – 2027

Bachelor of Engineering in Computer Science Engineering

Senior Secondary (Class XII – Science)

2022 – 2023

Guru Gobind Singh Public School

Projects

Personal Expenses Tracker (PxT)

Node.js, Express.js, MongoDB

- Collaborated with team members to understand user requirements and translate them into functional features.
- Analyzed user data and system workflows to improve performance and user journey.
- Worked with structured data and improved data flow across system components.
- Tested APIs, tracked system behavior, and ensured reliable and efficient performance.

E-Commerce Backend System

Node.js, Express.js, MongoDB

- Built backend modules such as authentication and order management with focus on efficiency.
- Collaborated across teams to optimize workflows and improve system performance.
- Debugged and resolved issues using structured and analytical problem-solving.
- Gained exposure to user journeys, system interactions, and product workflows.

Technical Skills

Programming Languages: Java, C++, C, JavaScript, Python

Software Development: Data Structures & Algorithms, Object-Oriented Programming, Problem Solving

Web Development: Node.js, Express.js, REST APIs

Databases: MongoDB, SQL

Systems: Operating Systems, Linux/Unix, Networking Fundamentals

Tools: Git, GitHub, Postman

Cloud (Exposure): AWS (Basics), Docker (Basics)

Relevant Coursework

Data Structures, Algorithms, Database Management Systems, Operating Systems, Computer Networks, Software Engineering

- Strong problem-solving and analytical skills
- Effective communication skills (verbal and written)
- Good interpersonal skills and ability to collaborate in teams
- Ability to write clean, efficient, and maintainable code
- Debugging and performance optimization
- Quick learner with adaptability in fast-paced environments

Additional Highlights

- Regularly practicing Data Structures and Algorithms on coding platforms
- Strong interest in backend development and system design
- Actively learning cloud technologies such as AWS and Docker
